

This is your periodic update on all things EDMS, DEQ’s Electronic Document Management System. Stay updated on the EDMS Redesign Project status, timelines, and latest news.

Current Project Status

Along with the new look and feel of the EDMS application, a new EDMS logo was designed to incorporate the LDEQ logo. You will see this logo in the upper left corner of the menu bar on every page of EDMS.

The EDMS Redesign Project Manager, George Sofka from Access Sciences, recently reported:

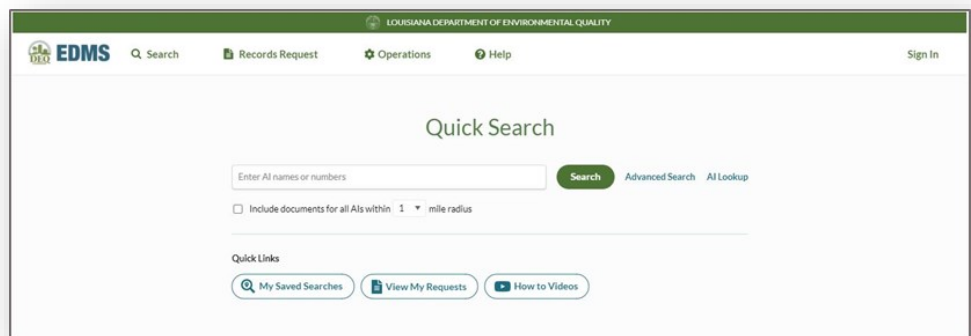

“The EDMS Redesign Project is progressing smoothly. The final user interface design is complete and the application development phase has launched.”

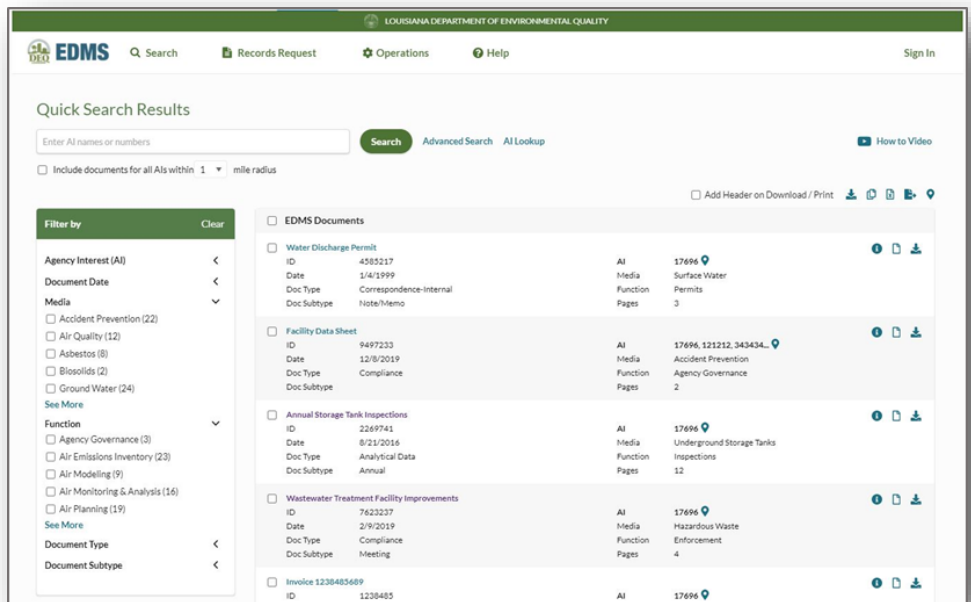

EDMS Quick Search Pages

Below are screenshots of the Quick Search pages and their new features. The next edition of the Project News will highlight the AI Lookup pages.

The **Quick Search** page will serve as the EDMS landing page, which is the screen you will see when you access EDMS. You will be able to search for one or multiple AIs, include documents for all AIs within a certain mile radius, and access Advanced Search, AI Lookup, Saved Searches, How to Videos, and other features on this screen. See the screenshot below.

The **Quick Search Results** page provides a grid view of the relevant documents and additional information about each document retrieved. You can refine search results by selecting one or more filters on the left menu bar, such as AI, Document Date, Media, Function, Document Type, and Document Sub-Type.
